

SH-PTP1 (phospho Tyr536) Polyclonal Antibody

Catalog No: YP0580

Reactivity: Human; Mouse; Rat

Applications: WB;IHC;IF;ELISA

Target: SH-PTP1

Fields: >>Adherens junction;>>JAK-STAT signaling pathway;>>Natural killer cell

mediated cytotoxicity;>>T cell receptor signaling pathway;>>B cell receptor

signaling pathway;>>Pathogenic Escherichia coli

infection;>>Leishmaniasis;>>Proteoglycans in cancer;>>PD-L1 expression and

PD-1 checkpoint pathway in cancer

Gene Name: PTPN6

Protein Name: Tyrosine-protein phosphatase non-receptor type 6

P29350

P29351

Human Gene Id: 5777

Human Swiss Prot

No:

Mouse Gene Id: 15170

Mouse Swiss Prot

No:

Rat Gene Id: 116689

Rat Swiss Prot No: P81718

Immunogen: The antiserum was produced against synthesized peptide derived from human

SHP-1 around the phosphorylation site of Tyr536. AA range:502-551

Specificity: Phospho-SH-PTP1 (Y536) Polyclonal Antibody detects endogenous levels of

SH-PTP1 protein only when phosphorylated at Y536.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

1/4

Source: Polyclonal, Rabbit, IgG

Dilution : WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:10000.. IF 1:50-200

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 67kD

Cell Pathway: B_Cell_Antigen; Adherens_Junction; T_Cell_Receptor; MAPK;

Protein Acetylation

Background: The protein encoded by this gene is a member of the protein tyrosine

phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. N-terminal part of this PTP contains two tandem Src homolog (SH2) domains, which act as protein phospho-tyrosine binding domains, and mediate the interaction of this PTP with its substrates. This PTP is expressed primarily in hematopoietic cells, and functions as an important regulator of multiple signaling pathways in hematopoietic cells. This PTP has been shown to interact with, and dephosphorylate a wide spectrum of phosphoproteins involved in hematopoietic cell signaling. Multiple alternatively spliced variants of this gene, which encode distinct isoforms, have been reported.

[provided by RefSeq, Jul

Function : catalytic activity:Protein tyrosine phosphate + H(2)O = protein tyrosine +

phosphate.,function:Plays a key role in hematopoiesis. This PTPase activity may directly link growth factor receptors and other signaling proteins through protein-tyrosine phosphorylation. The SH2 regions may interact with other cellular components to modulate its own phosphatase activity against interacting

substrates. Together with MTUS1, induces UBE2V2 expression upon angiotensin

II stimulation., PTM: Phosphorylated on serine and tyrosine

residues.,similarity:Belongs to the protein-tyrosine phosphatase family. Non-receptor class 2 subfamily.,similarity:Contains 1 tyrosine-protein phosphatase domain.,similarity:Contains 2 SH2 domains.,subcellular location:In neurons, translocates into the nucleus after treatment with angiotensin II.,subunit:Monomer.

Interacts with MTUS1 (By similarity). Binds PTPNS1, LILRB1 and LI

Subcellular Location:

Cytoplasm. Nucleus. In neurons, translocates into the nucleus after treatment with angiotensin II (By similarity). Shuttles between the cytoplasm and nucleus via

its association with PDPK1...

Isoform 1 is expressed in hematopoietic cells. Isoform 2 is expressed in non-

Expression: hematopoietic cells.

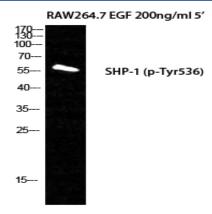

Tag: orthogonal,hot

Sort : 16316

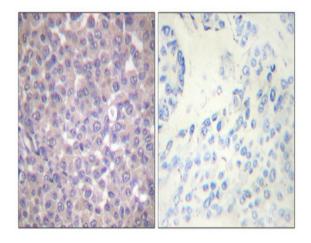

Host: Rabbit

Modifications: Phospho

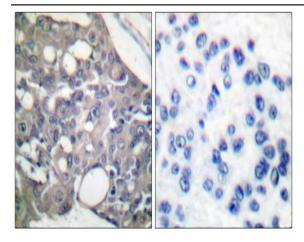

Products Images

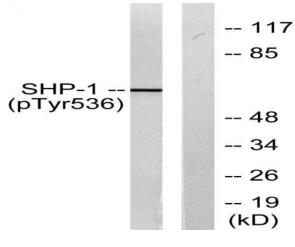

Western Blot analysis of RAW264.7+EGF cells using Phospho-SH-PTP1 (Y536) Polyclonal Antibody

Immunohistochemical analysis of paraffin-embedded Human breast cancer. Antibody was diluted at 1:100(4° overnight). Highpressure and temperature Tris-EDTA,pH8.0 was used for antigen retrieval. Negetive contrl (right) obtaned from antibody was preabsorbed by immunogen peptide.

Immunohistochemistry analysis of paraffin-embedded human breast carcinoma, using SHP-1 (Phospho-Tyr536) Antibody. The picture on the right is blocked with the phospho peptide.

Western blot analysis of lysates from RAW264.7 cells treated with EGF 200ng/ml 5', using SHP-1 (Phospho-Tyr536) Antibody. The lane on the right is blocked with the phospho peptide.
