

CUTL1 (Phospho Ser1215) rabbit pAb

Catalog No: YP1769

Reactivity: Human; Mouse; Rat

Applications: WB

Target: CUTL1

Gene Name: CUX1 CUTL1

Protein Name: CUTL1 (Phospho-Ser1215)

P39880

P53564

Human Gene Id: 1523

Human Swiss Prot

No:

Mouse Gene Id: 13047

Mouse Swiss Prot

No:

Rat Swiss Prot No: P53565

Immunogen: Synthesized peptide derived from human CUTL1 (Phospho-Ser1215)

Specificity: This antibody detects endogenous levels of CUTL1 (Phospho-Ser1215) at

Human, Mouse, Rat

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500-2000

Purification: The antibody was affinity-purified from rabbit serum by affinity-chromatography

using specific immunogen.

Concentration: 1 mg/ml

1/2

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Molecularweight: 166kD

Background: The protein encoded by this gene is a member of the homeodomain family of

DNA binding proteins. It may regulate gene expression, morphogenesis, and differentiation and it may also play a role in the cell cycle progession. Several alternatively spliced transcript variants encoding different isoforms have been

identified.[provided by RefSeq, Feb 2011],

Function: alternative products:Additional isoforms seem to exist, function:May be involved

in intra-Golgi retrograde transport.,function:Probably has a broad role in mammalian development as a repressor of developmentally regulated gene expression. May act by preventing binding of positively-activing CCAAT factors to promoters. Component of nf-munr repressor; binds to the matrix attachment regions (MARs) (5' and 3') of the immunoglobulin heavy chain enhancer.

Represses T-cell receptor (TCR) beta enhancer function by binding to MARbeta,

an ATC-rich DNA sequence located upstream of the TCR beta

enhancer.,miscellaneous:Asn-1290 may participate in regulating DNA-binding activity by promoting homo- and heterodimerization.,PTM:Phosphorylated upon DNA damage, probably by ATM or ATR.,similarity:Belongs to the CASP family.,similarity:Belongs to the CUT homeobox family.,similarity:Contains 1

homeobox DNA-bin

Subcellular Location :

Nucleus.

Expression: Colon, Duodenum, Liver, Umbilical vein,

Sort: 25248
