

## **FAF1 Polyclonal Antibody**

YT1658 **Catalog No:** 

Human; Mouse; Rat **Reactivity:** 

**Applications:** WB;ELISA

Target: FAF1

Fields: >>Necroptosis

**Gene Name:** FAF1

**Protein Name:** FAS-associated factor 1

Q9UNN5

P54731

**Human Gene Id:** 11124

**Human Swiss Prot** 

No:

Mouse Gene Id: 14084

**Mouse Swiss Prot** 

No:

Rat Gene Id: 140657

Q924K2 **Rat Swiss Prot No:** 

Immunogen: The antiserum was produced against synthesized peptide derived from human

FAF1. AA range:531-580

**Specificity:** FAF1 Polyclonal Antibody detects endogenous levels of FAF1 protein.

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Formulation:

Source: Polyclonal, Rabbit, IgG

WB 1:500 - 1:2000. ELISA: 1:5000. Not yet tested in other applications. **Dilution:** 

1/2

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

**Concentration:** 1 mg/ml

**Storage Stability:** -15°C to -25°C/1 year(Do not lower than -25°C)

75kD Observed Band:

**Background:** Interaction of Fas ligand (TNFSF6) with the FAS antigen (TNFRSF6) mediates

> programmed cell death, also called apoptosis, in a number of organ systems. The protein encoded by this gene binds to FAS antigen and can initiate apoptosis or enhance apoptosis initiated through FAS antigen. Initiation of apoptosis by the protein encoded by this gene requires a ubiquitin-like domain but not the FAS-

binding domain. [provided by RefSeg, Jul 2008],

**Function:** function:Potentiates but cannot initiate FAS-induced

> apoptosis., similarity: Contains 1 UBX domain., subunit: Specifically interacts with the cytoplasmic domain of FAS., tissue specificity: Most abundant in testis, slightly less abundant in skeletal muscle and heart, followed by prostate, thymus, ovary,

small intestine, and colon. Not detected in the peripheral blood leukocytes.,

Subcellular Location:

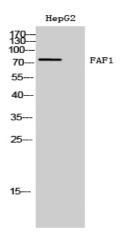

Nucleus.

Most abundant in testis, slightly less abundant in skeletal muscle and heart, **Expression:** 

followed by prostate, thymus, ovary, small intestine, and colon. Not detected in

the peripheral blood leukocytes.
