

AIP4 Polyclonal Antibody

| Catalog No : | YT0152 | |
|--------------------------|---|--|
| Reactivity : | Human;Mouse | |
| Applications : | WB;ELISA | |
| Target : | AIP4 | |
| Fields : | >>Ubiquitin mediated proteolysis;>>Endocytosis;>>TNF signaling pathway;>>Non-alcoholic fatty liver disease | |
| Gene Name : | ITCH | |
| Protein Name : | E3 ubiquitin-protein ligase Itchy homolog | |
| Human Gene Id : | 83737 | |
| Human Swiss Prot No : | Q96J02 | |
| Mouse Gene Id : | 16396 | |
| Mouse Swiss Prot No : | Q8C863 | |
| Immunogen : | The antiserum was produced against synthesized peptide derived from human ITCH. AA range:386-435 | |
| Specificity : | AIP4 Polyclonal Antibody detects endogenous levels of AIP4 protein. | |
| Formulation : | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. | |
| Source : | Polyclonal, Rabbit,IgG | |
| Dilution : | WB 1:500 - 1:2000. ELISA: 1:40000. Not yet tested in other applications. | |
| Purification : | The antibody was affinity-purified from rabbit antiserum by affinity- chromatography using epitope-specific immunogen. | |
| Concentration : | 1 mg/ml | |

| Best Tools for immunology Research | | |
|------------------------------------|---|--|
| Storage Stability : | -15°C to -25°C/1 year(Do not lower than -25°C) | |
| Observed Band : | _103kD | |
| Cell Pathway : | Ubiquitin mediated proteolysis;Endocytosis; | |
| Background : | itchy E3 ubiquitin protein ligase(ITCH) Homo sapiens This gene encodes a member of the Nedd4 family of HECT domain E3 ubiquitin ligases. HECT domain E3 ubiquitin ligases transfer ubiquitin from E2 ubiquitin-conjugating enzymes to protein substrates, thus targeting specific proteins for lysosomal degradation. The encoded protein plays a role in multiple cellular processes including erythroid and lymphoid cell differentiation and the regulation of immune responses. Mutations in this gene are a cause of syndromic multisystem autoimmune disease. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Mar 2012], | |
| Function : | function:E3 ubiquitin-protein ligase which accepts ubiquitin from an E2 ubiquitin- conjugating enzyme in the form of a thioester and then directly transfers the ubiquitin to targeted substrates. Regulates the transcriptional activity of several transcription factors, and probably plays an important role in the regulation of immune response.,pathway:Protein modification; protein ubiquitination.,PTM:Phosphorylated on tyrosine residues.,similarity:Contains 1 C2 domain.,similarity:Contains 1 HECT (E6AP-type E3 ubiquitin-protein ligase) domain.,similarity:Contains 4 WW domains.,subunit:Interacts via its WW domains with DRPLA, NFE2 and CBLC. Interacts with Epstein-Barr virus LMP2A. Interacts with NOTCH1, OCLN, JUN and JUNB. Interacts with NDFIP1 in vitro (By similarity). Interacts with ARHGEF7.,tissue specificity:Widely expressed., | |
| Subcellular Location : | Cell membrane ; Peripheral membrane protein ; Cytoplasmic side . Cytoplasm . Nucleus . Early endosome membrane ; Peripheral membrane protein ; Cytoplasmic side . Endosome membrane ; Peripheral membrane protein ; Cytoplasmic side . May be recruited to exosomes by NDFIP1 (PubMed:18819914). Localizes to plasma membrane upon CXCL12 stimulation where it co-localizes with CXCL4 (PubMed:14602072). Localization to early endosomes is increased upon CXCL12 stimulation where it co-localizes with DTX3L and CXCL4 (PubMed:24790097) | |
| Expression : | Widely expressed. | |
