

Atg4A Polyclonal Antibody

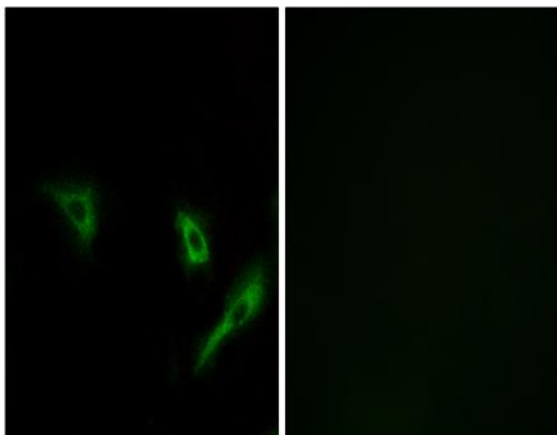

Catalog No :	YT0393
Reactivity :	Human;Mouse
Applications :	WB;IHC;IF;ELISA
Target :	ATG4A
Fields :	>>Autophagy - other;>>Autophagy - animal
Gene Name :	ATG4A
Protein Name :	Cysteine protease ATG4A
Human Gene Id :	115201
Human Swiss Prot No :	Q8WYN0
Mouse Gene Id :	666468
Mouse Swiss Prot No :	Q8C9S8
Immunogen :	The antiserum was produced against synthesized peptide derived from human ATG4A. AA range:81-130
Specificity :	Atg4A Polyclonal Antibody detects endogenous levels of Atg4A protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG
Dilution :	WB 1:500 - 1:2000. IHC 1:100 - 1:300. IF 1:200 - 1:1000. ELISA: 1:20000. Not yet tested in other applications.
Purification :	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Concentration :	1 mg/ml

Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)
Molecularweight :	45kD
Cell Pathway :	Regulation of autophagy;
Background :	Autophagy is the process by which endogenous proteins and damaged organelles are destroyed intracellularly. Autophagy is postulated to be essential for cell homeostasis and cell remodeling during differentiation, metamorphosis, non-apoptotic cell death, and aging. Reduced levels of autophagy have been described in some malignant tumors, and a role for autophagy in controlling the unregulated cell growth linked to cancer has been proposed. This gene encodes a member of the autophagin protein family. The encoded protein is also designated as a member of the C-54 family of cysteine proteases. [provided by RefSeq, Mar 2016],
Function :	enzyme regulation:Inhibited by N-ethylmaleimide.,function:Cysteine protease required for autophagy, which cleaves the C-terminal part of either MAP1LC3, GABARAPL2 or GABARAP, allowing the liberation of form I. A subpopulation of form I is subsequently converted to a smaller form (form II). Form II, with a revealed C-terminal glycine, is considered to be the phosphatidylethanolamine (PE)-conjugated form, and has the capacity for the binding to autophagosomes. Preferred substrate is GABARAPL2 followed by MAP1LC3A and GABARAP.,similarity:Belongs to the peptidase C54 family.,tissue specificity:Widely expressed, at a low level, and the highest expression is observed in skeletal muscle and brain. Also detected in fetal liver.,
Subcellular Location :	Cytoplasm .
Expression :	Epithelium,Kidney,Ovary,Prostate,Testis,
