

Cytochrome C protein

CatalogNo: YD0024

Key Features

Reactivity

- Human

Applications

- WB, SDS-PAGE

Storage

Storage* -20°C/6 month, -80°C for long storage

Formulation Liquid in PBS

Recommended Dilution Ratios

WB 1:500-2000

Basic Information

Source E.coli

Purification E.coli

Purity SDS-PAGE >90%

Immunogen Information

Sequence Amino acid: 1-105, with his-MBP tag.

Target Information

Gene name CYCS CYC

Protein Name	Cytochrome c		
	Organism	Gene ID	UniProt ID
	Human	54205 ;	P99999 ;

Cellular Localization Mitochondrion intermembrane space. Loosely associated with the inner membrane.

Function DNA catabolic process, endonucleolytic, generation of precursor metabolites and energy, DNA metabolic process, DNA catabolic process, DNA fragmentation involved in apoptosis, apoptosis, activation of caspase activity, cell structure disassembly during apoptosis, nucleus organization, cell death, activation of caspase activity by cytochrome c,macromolecule catabolic process, regulation of cell death, positive regulation of peptidase activity, programmed cell death, energy derivation by oxidation of organic compounds, death, cellular component disassembly, electron transport chain, apoptotic nuclear changes, regulation of apoptosis, regulation of programmed cell death, positive regulation of catalytic activity, positive regulation of caspase activity, regulation of caspase activity, positive regulation of molecular function, cellular macromolecule catabolic process, cellular respiration, regulation of hydrolase activity,positive regulation of hydrolase activity, regulation of peptidase activity, regulation of endopeptidase activity,oxidation reduction,
