

Bcl-W protein

CatalogNo: YD0116

| Key Features

Reactivity

- Human

Applications

- WB,SDS-PAGE

| Storage

Storage* -20°C/6 month,-80°C for long storage

Formulation Liquid in PBS

| Recommended Dilution Ratios

WB 1:500-2000

| Basic Information

Source E.coli

Purification E.coli

Purity SDS-PAGE >90%

| Immunogen Information

Sequence Amino acid: 1-169, with his-MBP tag.

| Target Information

Gene name BCL2L2

Protein Name	Bcl-W protein		
	Organism	Gene ID	UniProt ID
	Human	599 ;	Q92843 ;
Cellular Localization	Mitochondrion membrane ; Peripheral membrane protein . Loosely associated with the mitochondrial membrane in healthy cells. During apoptosis, tightly bound to the membrane.		
Tissue specificity	Expressed (at protein level) in a wide range of tissues with highest levels in brain, spinal cord, testis, pancreas, heart, spleen and mammary glands. Moderate levels found in thymus, ovary and small intestine. Not detected in salivary gland, muscle or liver. Also expressed in cell lines of myeloid, fibroblast and epithelial origin. Not detected in most lymphoid cell lines.		
Function	reproductive developmental process, apoptosis, anti-apoptosis, gamete generation, spermatogenesis, sex differentiation, cell death, cell proliferation, gonad development, male gonad development, regulation of cell death,programmed cell death, death, sexual reproduction, multicellular organism reproduction, regulation of apoptosis,negative regulation of apoptosis, regulation of programmed cell death, negative regulation of programmed cell death,development of primary sexual characteristics, development of primary male sexual characteristics, male sex differentiation, male gamete generation, reproductive structure development, reproductive process in a multicellular organism, reproductive cellular process, Sertoli cell proliferation, negative regulation of cell death,
