

# Recombinant SARS-CoV-2(Covid-19) NSP3

CatalogNo: YD2187

## Key Features

### Reactivity

- Human virus

### MW

- 22kD (Calculated)

## Storage

### Storage\*

Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8 °C for one week . Store at -20 to -80 °C for twelve months from the date of receipt.

## Recommended Dilution Ratios

## Basic Information

<b>Source</b>	E.coli
<b>Purification</b>	E.coli
<b>Purity</b>	>90% as determined by SDS-PAGE

## Immunogen Information

## Target Information

<b>Gene name</b>	ORF1ab
<b>Protein Name</b>	nsp3,PL-PRO,Papain-like proteinase,X domain (Macro domain)

Organism	Gene ID	UniProt ID
Human	<a href="#">QHD43415.1</a> ;	

## Function

The coronaviral proteases, papain-like protease (PLpro) and 3C-like protease (3CLpro), are attractive antiviral drug targets because they are essential for coronaviral replication. PLpro has the additional function of stripping ubiquitin and ISG15 from host-cell proteins to aid coronaviruses in their evasion of the host innate immune responses. Targeting PLpro with antiviral drugs may have an advantage in not only inhibiting viral replication but also inhibiting the dysregulation of signaling cascades in infected cells that may lead to cell death in surrounding, uninfected cells.
