

Recombinant Human IL-33 protein ,N- His Tag

CatalogNo: YD2241

Key Features

Reactivity

Human

Recommended Dilution Ratios

Reconstitute in sterile water for a stock solution

Storage

Storage* Use a manual defrost freezer and avoid repeated freeze thaw cycles. Store at 2 to 8 °C

for one week . Store at -20 to -80 °C for twelve months from the date of receipt.

Formulation Supplied as solution form in 50mM phosphate pH7.5, 5mM DTT./ Lyophilized from 50mM

phosphate pH7.5, 5mM DTT.

Basic Information

Source E.coli

Purification E.coli

Purity >90% as determined by SDS-PAGE

Immunogen Information

Squence A DNA sequence encoding the human IL33(Ser112~Thr270) was fused with the N-

terminal His Tag

| Target Information

Protein Name	Organism	Gene ID	UniProt ID	
	Human	90865;	<u>095760;</u>	

Cellular Localization

Nucleus . Chromosome . Cytoplasm . Cytoplasmic vesicle, secretory vesicle . Secreted . Associates with heterochromatin and mitotic chromosomes (PubMed:17185418). The secretion is dependent on protein unfolding and facilitated by the cargo receptor TMED10; it results in protein translocation from the cytoplasm into the ERGIC (endoplasmic reticulum-Golgi intermediate compartment) followed by vesicle entry and secretion (PubMed:32272059). .

Tissue specificity Expressed at high level in high endothelial venules found in tonsils, Peyer patches and mesenteric lymph nodes. Almost undetectable in placenta.
