

c-Myb (Acetyl Lys471) Rabbit pAb

CatalogNo: YK0157

Key Features

Host Species

- Rabbit

Reactivity

- Human, Mouse

Applications

- WB, ELISA

MW

- 70kD (Observed)

Isotype

- IgG

Storage

Storage* -15°C to -25°C/1 year (Do not lower than -25°C)

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Recommended Dilution Ratios

WB 1:1000-2000

ELISA 1:5000-20000

Basic Information

Clonality Polyclonal

Immunogen Information

Immunogen Synthesized peptide derived from human c-Myb (Acetyl Lys471)

Specificity This antibody detects endogenous levels of Human, Mouse c-Myb (Acetyl Lys471). The name of modified sites may be influenced by many factors, such as species (the modified site was not originally found in human samples) and the change of protein sequence (the previous protein sequence is incomplete, and the protein sequence may be prolonged with the development of protein sequencing technology). When naming, we will use the "numbers" in historical reference to keep the sites consistent with the reports. The antibody binds to the following modification sequence (lowercase letters are modification sites): PFKHA

| Target Information

Gene name MYB
Protein Name c-Myb (Acetyl Lys471)

| Organism | Gene ID | UniProt ID |
|----------|-------------------------|--------------------------|
| Human | 4602 ; | P10242 ; |
| Mouse | 17863 ; | P06876 ; |

Cellular Localization Nucleus .

Function transcription, regulation of transcription, DNA-dependent, regulation of transcription, regulation of RNA metabolic process,
