

Leptin Mouse mAb

CatalogNo: YM1446

| Key Features

Host Species

- Mouse

Reactivity

- Human

Applications

- ELISA

MW

- 16kD (Observed)

| Recommended Dilution Ratios

ELISA 1:10000-20000

| Storage

Storage* -15°C to -25°C/1 year(Do not lower than -25°C)

Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

| Basic Information

Clonality Monoclonal

| Immunogen Information

Immunogen Purified recombinant full length of human Leptin protein expressed in E.coli.

Specificity This antibody detects human Leptin proteins.

| Target Information

Gene name lep

Protein Name**Organism****Gene ID****UniProt ID**

Human

[3952;](#)[P41159;](#)

Mouse

[P41160;](#)**Cellular
Localization**

Secreted .

Tissue specificity Adipose tissue is the main source of leptin. It is also produced by other peripheral tissues such as the skeletal muscle (PubMed:7789654, PubMed:16052473, PubMed:12448771). Expressed by intercalated and striated tracts of submandibular and parotid salivary gland intralobular ducts (PubMed:12448771). Detected by fundic epithelium of the gastric mucosa (PubMed:10896907). Secreted into blood and gastric juice (PubMed:10896907).

Function

Disease:Defects in LEP may be a cause of autosomal recessive obesity [MIM:601665].,Function:May function as part of a signaling pathway that acts to regulate the size of the body fat depot. An increase in the level of LEP may act directly or indirectly on the CNS to inhibit food intake and/or regulate energy expenditure as part of a homeostatic mechanism to maintain constancy of the adipose mass.,online information:Leptin entry,similarity:Belongs to the leptin family.,subunit:Interacts with SIGLEC6.,

Validation Data

Indirect ELISA assay for anti-Leptin mouse mAb. Antigen coating concentration: 4ug/ml.
