

Leptin Mouse mAb

CatalogNo: YM1446

Key Features

Host Species

Mouse

Reactivity

Human

Applications
• ELISA

MW • 16kD (Observed)

Recommended Dilution Ratios

ELISA 1:10000-20000

Storage

Storage*	-15°C to -25°C/1 year(Do not lower than -25°C)
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Basic Information

Clonality Monoclonal

Clone Number 6H8

Immunogen Information

ImmunogenPurified recombinant full length of human Leptin protein expressed in E.coli.SpecificityThis antibody detects human Leptin proteins.

Target Information

Gene name LEP OB OBS

Drotoin Namo	Lontin (Oboco	protoin)	(Obacity factor)
Protein Name	Leptin (Obese	protein)	(Obesity factor)

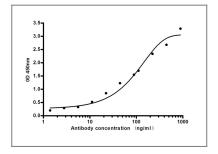

Organism	Gene ID	UniProt ID
Human	<u>3952;</u>	<u>P41159;</u>
Mouse	<u>16846;</u>	<u>P41160;</u>

Cellular	Secreted .
----------	------------

Localization

- **Tissue specificity** Adipose tissue is the main source of leptin. It is also produced by other peripheral tissues such as the skeletal muscle (PubMed:7789654, PubMed:16052473, PubMed:12448771). Expressed by intercalated and striated tracts of submandibular and parotid salivary gland intralobular ducts (PubMed:12448771). Detected by fundic epithelium of the gastric mucosa (PubMed:10896907). Secreted into blood and gastric juice (PubMed:10896907).
- FunctionDisease:Defects in LEP may be a cause of autosomal recessive obesity
[MIM:601665].,Function:May function as part of a signaling pathway that acts to regulate
the size of the body fat depot. An increase in the level of LEP may act directly or indirectly
on the CNS to inhibit food intake and/or regulate energy expenditure as part of a
homeostatic mechanism to maintain constancy of the adipose mass.,online
information:Leptin entry,similarity:Belongs to the leptin family.,subunit:Interacts with
SIGLEC6.,

Validation Data

Indirect ELISA assay for anti-Leptin mouse mAb.Antigen coating concentration: 4ug/ml.
