

CREB-1 (Phospho Ser133) (PT0863R) PT™ Rabbit mAb

CatalogNo: YM8632 **Recombinant** 

Key Features

Host Species

- Rabbit

Reactivity

- Human, Mouse, Rat, Pig

Applications

- WB, IHC, IF, IP, ELISA

MW

- 37kD (Calculated)
- 43kD (Observed)

Isotype

- IgG, Kappa

Storage

Storage*

-15°C to -25°C/1 year (Do not lower than -25°C)

Recommended Dilution Ratios

IHC 1:1000-1:4000

WB 1:2000-1:10000

IF 1:200-1:1000

ELISA 1:5000-1:20000

IP 1:50-1:200

Basic Information

Clonality Monoclonal

Clone Number PT0863R

Immunogen Information

Immunogen The specific immunogen used to produce this antibody is proprietary information.

Specificity Phospho-CREB-1 (S133) Antibody detects endogenous levels of CREB-1 protein only when phosphorylated at S133. The name of modified sites may be influenced by many factors, such as species (the modified site was not originally found in human samples) and the change of protein sequence (the previous protein sequence is incomplete, and the protein sequence may be prolonged with the development of protein sequencing technology). When naming, we will use the "numbers" in historical reference to keep the sites consistent with the reports. The antibody binds to the following modification sequence (lowercase letters are modification sites):RPSYR

Target Information

Gene name	CREB1		
Protein Name	Cyclic AMP-responsive element-binding protein 1		
	Organism	Gene ID	UniProt ID
	Human	1385 ;	P16220 ;
	Mouse	12912 ;	Q01147 ;
	Rat	81646 ;	P15337 ;
Cellular Localization	Nucleus .		
Tissue specificity	Eye,Placenta,Spleen,Testis,		
Function	Disease:A chromosomal aberration involving CREB1 is associated with angiomatoid fibrous histiocytoma (AFH) [MIM:612160]. Translocation t(2;22)(q33;q12) with CREB1 generates a EWSR1/CREB1 fusion gene that is most common genetic abnormality in this tumor type.,Function:This protein binds the cAMP response element (CRE), a sequence present in many viral and cellular promoters. CREB stimulates transcription on binding to the CRE. Transcription activation is enhanced by the TORC coactivators which act independently of Ser-133 phosphorylation. Implicated in synchronization of circadian rhythmicity.,PTM:Stimulated by phosphorylation. Phosphorylation of both Ser-133 and Ser-142 in the SCN regulates the activity of CREB and participates in circadian rhythm generation. Phosphorylation of Ser-133 allows CREBBP binding (By similarity). Phosphorylated upon DNA damage, probably by ATM or ATR.,similarity:Belongs to the bZIP family.,similarity:Contains 1 bZIP domain.,similarity:Contains 1 KID (kinase-inducible) domain.,subunit:Interacts with PPRC1. Binds DNA as a dimer. This dimer is stabilized by magnesium ions. Interacts, through the bZIP domain, with the coactivators TORC1/CRTC1, TORC2/CRTC2 and TORC3/CRTC3. When phosphorylated on Ser-133, binds CREBBP.,		

Validation Data

Various whole cell lysates were separated by 4-20% SDS-PAGE, and the membrane was blotted with anti-CREB-1 (Phospho Ser133) antibody. The HRP-conjugated Goat anti-Rabbit IgG (H + L) antibody was used to detect the antibody. Lane 1: HeLa Lane 2: HeLa was treated with Anisomycin (250 ng/ml) for 30 minutes Predicted band size: 37kDa Observed band size: 43kDa

Rat brain was stained with anti-CREB-1 (Phospho Ser133) rabbit antibody

Human brain was stained with anti-CREB-1 (Phospho Ser133) rabbit antibody

Immunofluorescence analysis of HeLa cell. 1, mouse Tubulin Antibody YM3035 (green) was diluted at 1:200 (4°C overnight). CREB-1 (Phospho Ser133) (PT0863R) Rabbit mAb (red) was diluted at 1:200 (4°C overnight). 2, Goat Anti Rabbit Alexa Fluor 594 Catalog:RS3611 was diluted at 1:1000 (room temperature, 50min). Goat Anti Mouse Alexa Fluor 488 Catalog:RS3208 was diluted at 1:1000 (room temperature, 50min).
