

## B2L13 Rabbit pAb

CatalogNo: YN1856

### | Key Features

#### Host Species

- Rabbit

#### Reactivity

- Human, Mouse, Rat

#### Applications

- WB, ELISA

#### MW

- 53kD (Observed)

#### Isotype

- IgG

### | Recommended Dilution Ratios

**WB 1:500-2000**

**ELISA 1:5000-20000**

### | Storage

**Storage\*** -15°C to -25°C/1 year (Do not lower than -25°C)

**Formulation** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

### | Basic Information

**Clonality** Polyclonal

### | Immunogen Information

**Immunogen** Synthesized peptide derived from part region of human protein

**Specificity** B2L13 Polyclonal Antibody detects endogenous levels of protein.

### | Target Information

**Gene name** BCL2L13 MIL1 CD003

|                              |                                                                                                                                                                                                                                                                                                                 |                        |                         |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|-------------------------|
| <b>Protein Name</b>          | Bcl-2-like protein 13 (Bcl2-L-13) (Bcl-rambo) (Protein Mil1)                                                                                                                                                                                                                                                    |                        |                         |
|                              | <b>Organism</b>                                                                                                                                                                                                                                                                                                 | <b>Gene ID</b>         | <b>UniProt ID</b>       |
|                              | Human                                                                                                                                                                                                                                                                                                           | <a href="#">23786;</a> | <a href="#">Q9BXK5;</a> |
|                              | Mouse                                                                                                                                                                                                                                                                                                           |                        | <a href="#">P59017;</a> |
| <b>Cellular Localization</b> | [Isoform 2]: Mitochondrion membrane ; Single-pass membrane protein . Nucleus .; [Isoform 1]: Nucleus .                                                                                                                                                                                                          |                        |                         |
| <b>Tissue specificity</b>    | Ubiquitous, with the highest levels of expression in heart, placenta and pancreas.                                                                                                                                                                                                                              |                        |                         |
| <b>Function</b>              | Alternative products:Experimental confirmation may be lacking for some isoforms,Function:May promote the activation of caspase-3 and apoptosis.,similarity:Belongs to the Bcl-2 family.,subunit:Monomer.,tissue specificity:Ubiquitous, with the highest levels of expression in heart, placenta and pancreas., |                        |                         |
