

## PPIL4 Rabbit pAb

CatalogNo: YN7320

### Key Features

#### Host Species

- Rabbit

#### Reactivity

- Human, Mouse

#### Applications

- WB

#### MW

- 54kD (Calculated)

#### Isotype

- IgG

### Recommended Dilution Ratios

WB 1:500-2000

### Storage

#### Storage\*

-15°C to -25°C/1 year(Do not lower than -25°C)

#### Formulation

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

### Basic Information

#### Clonality

Polyclonal

### Immunogen Information

#### Immunogen

Synthesized peptide derived from human PPIL4

#### Specificity

This antibody detects endogenous levels of PPIL4 at Human, Mouse

### Target Information

#### Gene name

PPIL4

|                       |                                                                                                                                                        |                         |                          |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------|
| Protein Name          | Peptidyl-prolyl cis-trans isomerase-like 4 (PPIase) (Cyclophilin-like protein PPIL4) (Rotamase PPIL4)                                                  |                         |                          |
|                       | Organism                                                                                                                                               | Gene ID                 | UniProt ID               |
|                       | Human                                                                                                                                                  | <a href="#">85313</a> ; | <a href="#">Q8WUA2</a> ; |
|                       | Mouse                                                                                                                                                  | <a href="#">67418</a> ; | <a href="#">Q9CXG3</a> ; |
| Cellular Localization | Nucleus .                                                                                                                                              |                         |                          |
| Tissue specificity    | Abundantly expressed in kidney but has a ubiquitously low expression pattern in other adult tissues.                                                   |                         |                          |
| Function              | PPIases accelerate the folding of proteins. It catalyzes the cis-trans isomerization of proline imidic peptide bonds in oligopeptides (By similarity). |                         |                          |
