

TIP60 Rabbit pAb

CatalogNo: YT4664

Key Features

Host Species

- Rabbit

Reactivity

- Human, Mouse

Applications

- IHC, IF, ELISA

MW

- 59kD (Calculated)

Isotype

- IgG

Recommended Dilution Ratios

IHC 1:100-1:300

IF 1:200-1:1000

ELISA 1:5000

Not yet tested in other applications.

Storage

Storage*

-15°C to -25°C/1 year (Do not lower than -25°C)

Formulation

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Basic Information

Clonality

Polyclonal

Immunogen Information

Immunogen

The antiserum was produced against synthesized peptide derived from human TIP60. AA range: 52-101

Specificity

TIP60 Polyclonal Antibody detects endogenous levels of TIP60 protein.

Target Information

Gene name KAT5

Protein Name Histone acetyltransferase KAT5

Organism	Gene ID	UniProt ID
Human	10524 ;	Q92993 ;
Mouse	81601 ;	Q8CHK4 ;

Cellular Localization Nucleus . Chromosome . Cytoplasm . Chromosome, centromere, kinetochore . Cytoplasm, cytoskeleton, spindle pole . Nucleus, nucleolus . Cytoplasm, perinuclear region . Upon stimulation with EDN1, it is exported from the nucleus to the perinuclear region and UV irradiation induces translocation into punctuate subnuclear structures named nuclear bodies (PubMed:11262386). Transiently localizes to kinetochores in early mitosis (PubMed:26829474). Localizes to spindle poles when chromosomes align during metaphase (PubMed:34608293). Localizes in the cytoplasm and nucleus of round spermatids (By similarity). .

Tissue specificity Brain,

Function negative regulation of transcription from RNA polymerase II promoter, regulation of cytokine production, negative regulation of cytokine production, DNA metabolic process, DNA repair, double-strand break repair, chromatin organization, chromatin assembly or disassembly, transcription, regulation of transcription, DNA-dependent, regulation of transcription from RNA polymerase II promoter, protein amino acid acetylation, response to DNA damage stimulus,DNA damage response, signal transduction by p53 class mediator resulting in transcription of p21 class mediator,intracellular signaling cascade, negative regulation of biosynthetic process, positive regulation of biosynthetic process,regulation of specific transcription from RNA polymerase II promoter, negative regulation of specific transcription from RNA polymerase II promoter, positive regulation of macromolecule biosynthetic process, negative regulation of macromolecule biosynthetic process, positive regulation of macromolecule metabolic process, negative regulation of macromolecule metabolic process, positive regulation of gene expression, negative regulation of gene expression,negative regulation of transcription, chromatin modification, covalent chromatin modification, histone modification,histone acetylation, DNA damage response, signal transduction by p53 class mediator, steroid hormone receptor signaling pathway, androgen receptor signaling pathway, intracellular receptor-mediated signaling pathway, negative regulation of cellular biosynthetic process, positive regulation of cellular biosynthetic process, negative regulation of gene-specific transcription, regulation of gene-specific transcription, regulation of interleukin-2 production, negative regulation of interleukin-2 production, cellular response to stress, regulation of growth, DNA damage response, signal transduction, DNA damage response, signal transduction resulting in transcription, protein amino acid acylation,regulation of transcription, negative regulation of transcription, DNA-dependent, positive regulation of transcription, DNA-dependent, negative regulation of nucleobase, nucleoside, nucleotide and nucleic acid metabolic process, positive regulation of nucleobase, nucleoside, nucleotide and nucleic acid metabolic process, positive regulation of transcription, positive regulation of transcription from RNA polymerase II promoter, negative regulation of nitrogen compound metabolic process, positive regulation of nitrogen compound metabolic process, negative regulation of multicellular organismal process, regulation of RNA metabolic process, negative regulation of RNA metabolic process,positive regulation of RNA metabolic process, chromosome organization,

| Validation Data

Immunofluorescence analysis of HeLa cells, using TIP60 Antibody. The picture on the right is blocked with the synthesized peptide.

Immunohistochemistry analysis of paraffin-embedded human liver carcinoma tissue, using TIP60 Antibody. The picture on the right is blocked with the synthesized peptide.
