

TNF-β Rabbit pAb

CatalogNo: YT4691

Key Features

| Host Species • Rabbit | Reactivity Human,Mouse,Rat,Monkey | ApplicationsWB,ELISA |
|--------------------------|---|---|
| MW • 22kD (Observed) | Isotype • IgG | |

Recommended Dilution Ratios

WB 1:500-1:2000 ELISA 1:40000 Not yet tested in other applications.

Storage

Storage*-15°C to -25°C/1 year(Do not lower than -25°C)FormulationLiquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Basic Information

Clonality Polyclonal

Immunogen Information

Immunogen The antiserum was produced against synthesized peptide derived from human TNF-beta. AA range:17-66

Specificity TNF-β Polyclonal Antibody detects endogenous levels of TNF-β protein.

Target Information

Gene name LTA

Protein Name Lymphotoxin-alpha

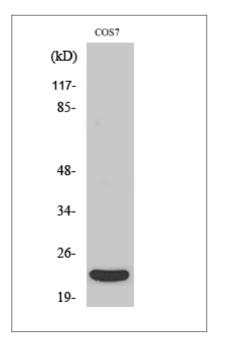

| Gene ID | UniProt ID | | |

CellularSecreted. Membrane. The homotrimer is secreted. The heterotrimer is membrane-
associated.

Tissue specificity Lymph,Peripheral blood leukocyte,Peripheral blood mononuclear cells,Peripheral blood mononu

Function Disease:Genetic variations in LTA are associated with susceptibility to leprosy type 4 (LPRS4) [MIM:610988]; also known as susceptibility to age-dependent leprosy. Leprosy is a chronic infectious disease of peripheral sensory nerves caused by Mycobacterium leprae., Disease: Genetic variations in LTA are associated with susceptibility to psoriatic arthritis [MIM:607507]. Psoriasis is a chronic inflammatory dermatosis that affects approximately 2% of the population. It is characterized by red, scaly skin lesions that are usually found on the scalp, elbows, and knees, and may be associated with severe arthritis. Psoriatic arthritis has been defined as an inflammatory arthritis usually without any rheumatoid factor in serum (seronegative arthritis) associated with psoriasis., Function: Cytokine that in its homotrimeric form binds to TNFRSF1A/TNFR1, TNFRSF1B/TNFBR and TNFRSF14/HVEM. In its heterotrimeric form with LTB binds to TNFRSF3/LTBR. Lymphotoxin is produced by lymphocytes and cytotoxic for a wide range of tumor cells in vitro and in vivo..online information:Lymphotoxin entry.online information: The Singapore human mutation and polymorphism database, similarity: Belongs to the tumor necrosis factor family., subcellular location: The homotrimer is secreted. The heterotrimer is membrane-associated.,subunit:Homotrimer, and heterotrimer of either two LTB and one LTA subunits or (less prevalent) two LTA and one LTB subunits.,

Validation Data

-117 -85 -49 -34 TNF-β- -25 Western Blot analysis of various cells using TNF- β Polyclonal Antibody diluted at 1:1000. Secondary antibody(catalog#:RS0002) was diluted at 1:20000

Western blot analysis of lysate from COS-7cell, using TNF- β antibodys.
