# **Ub Rabbit pAb**

CatalogNo: YT5432

## Key Features

Host Species

Rabbit

Reactivity

Human,Mouse,Rat

ApplicationsWB,ELISA

MW • 52kD (Observed)

Isotype • IgG

### **Recommended Dilution Ratios**

WB 1:500-1:2000 ELISA 1:20000 Not yet tested in other applications.

## **Storage**

Storage\*-15°C to -25°C/1 year(Do not lower than -25°C)FormulationLiquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

#### **Basic Information**

Clonality Polyclonal

## Immunogen Information

**Immunogen** Synthesized peptide derived from human Ub around the non-acetylation site of K63.

**Specificity** Ub Polyclonal Antibody detects endogenous levels of Ub protein only when acetylation at K63.

# Target Information

Gene name	UBA52/RPS27A/UBB/UBC			
Protein Name	Ubiquitin <b>Organism</b>	Gene ID	UniProt ID	
	Human	<u>7311;</u>	<u>P0CG47; P0CG48; P62979; P62987;</u>	
Cellular Localization	[Ubiquitin]: Cytoplasm . Nucleus .; [60S ribosomal protein L40]: Cytoplasm .			
Tissue specificity	Brain,Epithelium,Fetal brain cortex,Liver,L			
Function	Function:Protein modifier which can be covalently attached to target lysines either as a monomer or as a lysine-linked polymer. Attachment to proteins as a Lys-48-linked polymer usually leads to their degradation by proteasome. Attachment to proteins as a monomer or as an alternatively linked polymer does not lead to proteasomal degradation and may be required for numerous functions, including maintenance of chromatin structure, regulation of gene expression, stress response, ribosome biogenesis and DNA repair.,miscellaneous:This ribosomal protein is synthesized as a C-terminal extension protein (CEP) of ubiquitin.,miscellaneous:Ubiquitin is synthesized as a polyubiquitin precursor with exact head to tail repeats, the number of repeats differ between species and strains. In some species there is a final amino-acid after the last repeat, here in human a Val. Some ubiquitin genes contain a single copy of ubiquitin fused to a ribosomal protein (either L40 or S27a).,PTM:Several types of polymeric chains can be formed, depending on the lysine used for the assembly.,similarity:Belongs to the ribosomal protein L40e family.,similarity:Belongs to the ribosomal protein S27Ae family.,similarity:Belongs to the ubiquitin family.,
